PACKAGE ROOM

## PACKAGES—SAFE, SOUND, AND NO MORE "MISSED DELIVERY" NOTES ON THE DOOR.

When it comes to deliveries, let MVI do the heavy lifting with our innovative Package Room Solution.

Couriers are granted entry via our specialized KeyCom® LITE kiosk, then leave parcels in a secured room at the multi-family property.

Through the MVI MyKey™ app, a push notification signals the resident that their package is ready for pickup.

Residents are then allowed access into the package room via the MVI MyKey™ app, locate their parcel, and go!

It's that easy, safe, and convenient to manage package deliveries at your multifamily, commercial, or student properties with MVI Systems' Package Room Solution.
